Call us for pricing.

Soundmaster Containerized Dynamometer Test Rooms provide properly silenced ventilation, evacuate heat, CO, and hydrocarbons. This ensures correct and stable airflow, a safe working environment, and sound reduction beyond conventional construction.

Soundmaster Containerized Dynamometer Test Cells are a complete unit. Wired, lighted and ready to accept dynamometer test equipment. A level surface is required for location of test cell.

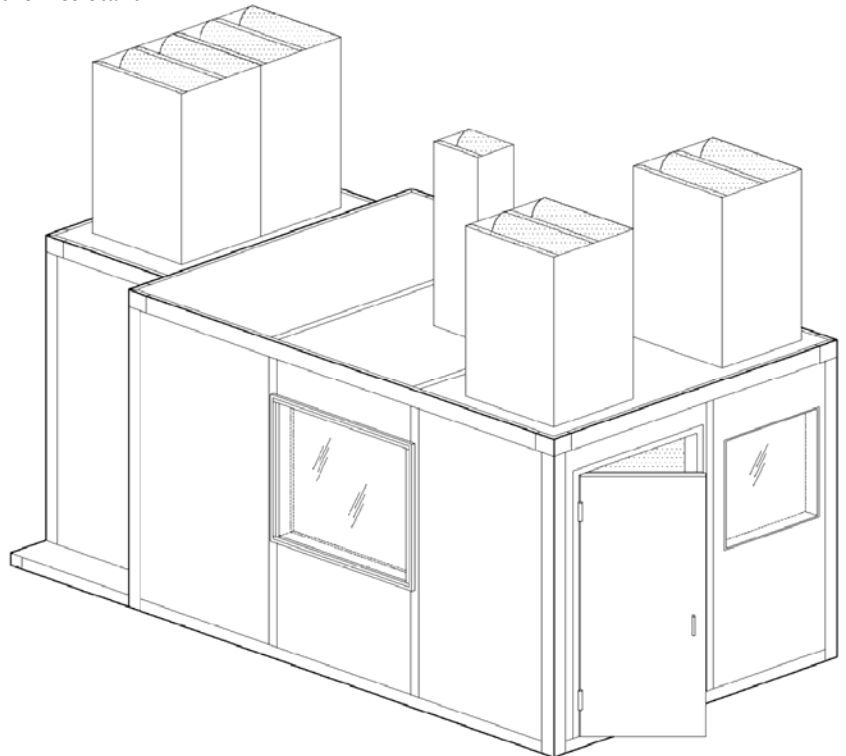

Professional Series

Perfect for noise sensitive areas
Provides in excess of 40dBA sound reduction
The best choice for noise sensitive environments.

Competitive Edge Series

Indoor/Outdoor applications
The best choice for less noise sensitive environments.

- **Modular Wall and Ceiling Panels**
 - 4" thick modular wall panels and 4" thick ceiling panels
- **Sound Control Doors**
 - STC rated sound door
- **Sound Control Windows**
 - Double glazed or projectile resistant window: up to 72" wide and 32" high
